

Mylan HIV Self Test

Safe, Convenient & Accurate

Mylan

Better Health
for a Better World

Mylan HIV Self Test

is one of the world's only integrated self-test device, providing greater convenience, ease-of-use and infield diagnostic performance when compared to other multi-component HIV test kits.

Designed as an at-home self-test,

Mylan HIV Self Test is a rapid, lateral flow *in vitro* qualitative immunoassay for the detection of antibodies to Human Immunodeficiency Virus Type 1 and Type 2 in human whole blood.

Small Blood

Sample: Mylan HIV Self Test needs only a small drop of blood from your fingertip.

Smart Design:

Its all-in-one design makes testing simpler, safer and more convenient

Accurate Result:

Proven to be 99.7% accurate, the test gives a result in just 15 minutes.

Sensitivity

Specificity

The all-in-one Mylan HIV Self Test device greatly simplifies the test procedure, reducing user errors and improving test accuracy. The innovative, user-centred design removes the need for multiple test components by integrating them into the device platform.

Mylan HIV Self Test

is one of the world's only integrated self-test device, providing greater convenience, ease-of-use and in-field diagnostic performance when compared to other multi-component HIV test kits.

Designed as an at-home self-test,

Mylan HIV Self Test is a rapid, lateral flow *in vitro* qualitative immunoassay for the detection of antibodies to Human Immunodeficiency Virus Type 1 and Type 2 in human whole blood.

Small Blood Sample: Mylan HIV Self Test needs only a small drop of blood from your fingertip.

Smart Design: Its all-in-one design makes testing simpler, safer and more convenient.

Accurate Result: Proven to be 99.7% accurate, the test gives a result in just 15 minutes.

Sensitivity

Specificity

Mylan HIV Self Test needs only a small drop of blood, obtained from the fingertip using the built-in safety lancet. The test device also incorporates a unique blood collection and delivery system to further simplify the test procedure and eliminate user errors common to other test kits.

Easy Blood Delivery

Blood is delivered cleanly to the test strip by simply rotating the blood collection unit. The test result is displayed clearly in just 15 minutes.

Accurate Blood Collection

The easy-to-use blood collection unit is designed to collect exactly the right sample volume, ensuring optimal test performance.

Built-in Safety Lancet

The auto-retracting safety lancet eliminates the risk of hazardous sharps injuries by locking the needle inside the device after use for safe disposal.

Mylan HIV Self Test is a very accurate, single use screening test for HIV, but a positive result will still need to be confirmed by your healthcare provider. Because the test detects HIV antibodies, it may not identify a very recent HIV infection. If you think you have been exposed to HIV within the last 3 months, you should consult your healthcare provider immediately.
